Contents of Volume 9

Numbers 1 and 2, September 25, 1962

P. K. Maitra and R. W. Estabrook. The ADP and Phosphate Control of Ethanol Oxidation in Baker's Yeast 1

Manju Kapoor and E. R. Waygood. Initial Steps of Purine Biosynthesis in Wheat Germ 7

Lewis R. Mandel and Ernest Borek. Ribonucleic Acid Synthesis under Relaxed Control 11

Salih J. Wakil and Moseley Waite. On the Mechanism of Action of Enzyme-Bound Biotin 18

S. Shankman, V. Gold, S. Higa, and R. Squires. On the Mode of Action of a Peptide Inhibitor of Growth in *P. cerevisiae* 25

Robert W. Bernlohr and Carl Sievert. Preliminary Chemical Characterization of the Spore Coats of *Bacillus licheniformis* 32

E. Grazi, P. T. Rowley, T. Cheng, O. Tchola, and B. L. Horecker. The Mechanism of Action of Aldolases: III. Schiff Base Formation with Lysine 38

Frank Davidoff and Edward D. Korn. Synthesis of Unsaturated Fatty Acids in the Cellular Slime Mold 44

Roderick K. Clayton. Evidence for the Photochemical Reduction on Coenzyme Q in Chromatophores of Photosynthetic Bacteria 49

Frank Davidoff and Edward D. Korn. Lipids of Dictyostelium Discoideum: Phospholipid Composition and the Presence of Two New Fatty Acids: *cis, cis*-5, 11-Octadecadienoic and *cis, cis*-5, 9-Hexadecadienoic Acids 54

E. M. Scott. Purification of Diphosphopyridine Nucleotide Diaphorase from Methemoglobinemic Erythrocytes 59

M. Karasek and G. Schramm. A Ribonucleotide Polymerase from Tobacco Leaves and the Formation of Viral Ribonucleic Acid *in Vitro* 63

F. Irreverre, K. Morita, S. Ishii, and B. Witkop Occurrence of *cis*- and *trans*-3-Hydroxy-L-Proline in Acid Hydrolyzate of Telomycin 69

B. R. Chatterjee and R. P. Williams. Evidence That Protein Synthesized in a Heterologous Cell-Free System Is Not Functional 72

Richard E. Beltz. Comparison of the Effects of X-Radiation on the Elevation of Thymidine Kinase and Thymidylate Synthetase during Liver Regeneration.. 78

Keiko Yanagisawa. Preferential Synthesis of β-Galactosidase after Amino Acid Starvation 84

Keiko Yanagisawa. The Simultaneous Accumulation of RNA and of a Repressor of β-Galactosidase Synthesis 88

Per Björntorp. A Nuclear Fraction Antagonizing Fatty Acid Effects on Rat Liver Mitochondria 94

Ki-han Kim and T. T. Tchen. Putrescine-α-Ketoglutarate Transaminase in *E. coli* 99

J. Erwin and Konrad Bloch. The α-Linolenic Acid Content of Some Photosynthetic Microorganisms 103

Robert A. Altenbern. Lysogeny and Toxinogeny in *Bacillus cereus*. 109

Malcolm J. Thompson, Spiro J. Louloudes, W. E. Robbins, James A. Waters, John A. Steele, and Erich Mosettig. Identity of the "House Fly Sterol" 113

R. W. Wheat, E. L. Rollins, and J. M. Leatherwood. Characterization of a 4-Amino-4:6-Dideoxy-Aldohexose from *Chromobacterium violaceum* 120

A. B. Falcone, A. L. Shug, and D. J. D. Nicholas. Oxidation of Hydroxylamine by Particles from *Nitrosomonas* 126

H. Schacter and G. H. Dixon. Identification of the Methionine Involved in the Active Center of Chymotrypsin 132
Chev Kidson. Two Leukocyte Enzymes with Catalase Activity in Acute Leukemia 138
Takekazu Horio and Takashi Yamashita. Some Properties of Photosynthetic Pyridine Nucleotide Reductase from Spinach 142
Thomas P. Singer, J. Hauber, and Edna B. Kearney. Fluorometric Determination of the Succinate Dehydrogenase Content of Respiratory Chain Preparations 146
Thomas P. Singer, J. Hauber, and Oreste Arrigoni. Application of Bound Flavin Analysis to the Study of the Turnover Number of Succinate Dehydrogenase and of the Reconstitution of the Succinoxidase System 150
David W. Kingsbury. Use of Actinomycin D to Unmask RNA Synthesis Induced by Newcastle Disease Virus 156
Darwin Prockop, Arnold Kaplan, and Sidney Udenfriend. Oxygen-18 Studies on the Conversion of Proline to Hydroxyproline 162
George Schapira, Dominique Labie, Jean Rosa, and Jean-Claude Dreyfus. Evidence for a Distinct Fraction of Hemoglobin, Specifically Associated with the Young Erythrocytes 167
Mitsuo Ebata, Joyce S. Tsunoda, and Kerry T. Yasunobu. Effect of Diisopropylphosphorofluoridate on Papain, Chymopapain, and Bromelain 173
D. W. Newman. Fatty Acids of Bush Bean Leaf Chloroplasts and Proplastids. ... 179
Thomas D. Brock. The Inhibition of an RNA Bacteriophage by Streptomycin, Using Host Bacteria Resistant to the Antibiotic 184
Ottavio Barnabei and Fabio Sereni. Factors Influencing Activity of Tyrosine-α-Ketoglutarate Transaminase in Isolated Rat Liver 188
Ekkehard K. F. Bautz. The Role of Phage-Specific RNA as Messenger. 192

Number 3, October 17, 1962

B. R. Baker and R. P. Patel. Non-classical Antimetabolites. IX. The Bridge Principle of Specificity with Exo-alkylating Irreversible Inhibitors. III. Detection of Differences in Specificity of Enzymic Nucleophilic Sites by the Carbophenoxy Group 199
A. Matsushiro, S. Kida, J. Ito, K. Sato, and F. Imamoto. The Regulatory Mechanism of Enzyme Synthesis in the Tryptophan Biosynthetic Pathway of *Escherichia coli* K12 204
Peter Knolle and Fritz Kaudewitz. Factors Affecting the Plaque-Yield Resulting from Infection of *E. coli* K12 Protoplasts by Phenol Extracts of the RNA-Phage ft5 208
W. S. Zaugg and J. S. Rieske. The Quantitative Estimation of Cytochrome b in Sub-mitochondrial Particles from Beef Heart 213
Keelin T. Fry and A. San Pietro. Studies on Photosynthetic Pyridine Nucleotide Reductase 218
R. Govindjee, Govindjee, and G. Hoch. The Emerson Enhancement Effect in TPN-Photoreduction by Spinach Chloroplasts 222
John E. Byfield, Shao-Chia Chou, and Otto H. Scherbaum. Some Observations on the Isolation of Mitochondria from *Tetrahymena pyriformis* GL .. 226
James F. Mead and Gabriel M. Levis. Alpha Oxidation of the Brain Fatty Acids 231
Jack Preiss. Enzymatic Oxidation of Guanosine Diphosphomannose to Guanosine Diphosphomannuronate 235
T. R. Henderson. Differential Inhibition of β-Galactosidase Induction and Synthesis by Deuterium Oxide 240

K. Makino, Y. Ooi, M. Matsuda, M. Tsuji, M. Matsumoto, and T. Kuroda. Some Notes on the Coenzyme Activity of Phosphopyridoxal Derivatives for the Brain Glutamic Decarboxylase 246
A. Parmeggiani and H. E. Morgan. Effect of Adenine Nucleotides and Inorganic Phosphate on Muscle Phosphorylase Activity 252
N. P. Sen, P. L. McGeer, and R. M. Paul. Imidazolepropionic Acid as a Urinary Metabolite of L-Histidine 257
Walter Dürckheimer and Louis A. Cohen. Mechanisms of α-Tocopherol Oxidation: Synthesis of the Highly Labile 9-Hydroxy-α-Tocopherone 262
Jeremiah E. Silbert. Incorporation of C^{14} from Labeled Glucuronic Acid and *N*-Acetyl Glucosamine into Polysaccharide by a Cell-Free Preparation from Mouse Mast-Cell Tumor 266
Sue Cheer and T. T. Tchen. Effect of Mitomycin C on the Synthesis of Induced β-Galactosidase in *E. coli* 271
J. Erik Jorpes, Viktor Mutt, Staffan Magnusson, and Barbara B. Steele. Amino Acid Composition and *N*-Terminal Amino Acid Sequence of Porcine Secretin 275
Arnd Michaelis, Hristo Nicoloff, and Rigomar Rieger. Influences of EDTA on the Induction of Chromatid Aberrations by Triethylenemelamine and Ethyl Alcohol 280
Thomas S. Matney and Néil E. Achenbach. A Comment on the Fertility of F_2 Donor Types of *Escherichia coli* K12 285

STATEMENT OF POLICY

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS has been initiated to meet the need for the rapid dissemination of information in all areas of experimental biology. This new medium is intended to afford an opportunity for rapid publication of timely and significant observations in the form of short but well documented communications. It will enable investigators in diverse fields of modern experimental biology better to keep abreast of current ideas and findings.

Rapid dissemination of this knowledge should prevent unnecessary duplication of effort; furthermore, new and exciting information will reach investigators in a minimum length of time.

It is hoped that authors will feel free to submit reports of current investigations which will be of immediate value to other scientists and promote the general progress of biochemical and biophysical research.
